SECTION 4 - FIRST AID MEASURES

Immediately flush eyes with plenty of water for 15 to 20 minutes. Get medical Eye Contact:

attention, if irritation or symptoms of overexposure persists.

Skin Contact: Immediately wash skin with soap and plenty of water. Get medical attention if irritation develops or persists.

If inhaled, remove to fresh air. If not breathing, give artificial respiration or give Inhalation: oxygen by trained personnel. Seek immediate medical attention.

If swallowed, do NOT induce vomiting. Call a physician or poison control center

immediately. Never give anything by mouth to an unconscious person.

SECTION 5 - FIRE FIGHTING MEASURES

Flash Point: > 93 °C (> 199 °F) Lower Flammable/Explosive Limit: Not applicable. Upper Flammable/Explosive Limit: Not applicable.

Use alcohol resistant foam, carbon dioxide, dry chemical, or water fog or spray Extinguishing Media:

when fighting fires involving this material.

Unsuitable Media: Do not use a solid water stream as it may scatter and spread fire.

As in any fire, wear Self-Contained Breathing Apparatus (SCBA), MSHA/NIOSH Protective Equipment:

(approved or equivalent) and full protective gear.

Oxides of carbon, oxides of nitrogen, aliphatic aldehydes, and other organic substances may be formed during combustion. Melted solder above 1000 deg F will liberate toxic lead and/or antimony fumes Hazardous Combustion

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Evacuate area and keep unnecessary and unprotected personnel from entering the

spill area. Avoid inhaling vapors, mists, or fumes. Avoid contact with skin, eyes

and clothing.

Environmental Precautions: Avoid runoff into storm sewers, ditches, and waterways. Methods for containment: Melted solder will solidify on cooling and can be scraped up.

Methods for cleanup: Solidfied solder can be scraped up upon cooling. Use caution to avoid breathing

fumes if a gas torch is used to cut up large pieces

SECTION 7 - HANDLING and STORAGE

Handling: Use with adequate ventilation. Avoid breathing vapor and fumes. Use only in accordance with directions.

No special storage conditions required. Storage:

Hygiene Practices: Wash thoroughly after handling. Avoid inhaling vapors, mists, or fumes

SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION - EXPOSURE GUIDELINES

Engineering Controls:

Use appropriate engineering control such as process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Where such systems are not effective wear suitable personal protective equipment, which performs satisfactorily and meets OSHA or other recognized standards. Consult with local procedures for selection, training, inspection and maintenance of the personal protective equipment.

Eye/Face Protection: Safety glasses with side-shields.

Hand Protection Description: Wear appropriate protective gloves. Consult glove manufacturer's data for

permeability data.

Respiratory Protection: The need for respiratory protection will vary according to the airborne concentration of the decomposition products released and accumulated in the

area. Wear the appropriate respiratory protection according to the conditions and
